Summary

AI & Machine Learning Engineer with hands-on experience building end-to-end AI and ML systems, including NLP, RAG, LLMs, and deep learning applications. Skilled in Python, Scikit-learn, TensorFlow, SQL, and Streamlit, with experience in developing real-world AI solutions, delivering technical instruction, and mentoring students.

Education

Benha University – Faculty of Computers and Artificial Intelligence ,Bachelor’s Degree in Computer and Artificial Intelligence Expected Graduation: 2027 GPA: 3.1

Professional Experience

AI Instructor (Part-Time) – 3C 2025 – Present

- **Delivered Artificial Intelligence and Machine Learning fundamentals to student groups.**
- **Mentored students in implementing real-world AI mini-projects.**

Machine Learning Instructor – GDG (Google Developer Groups) 2025

- **Contributed as an ML instructor in Data Science & AI Bootcamp.**

Projects

TrendTales AI — AI-Powered Trend-to-Story Generation System

- **Built an end-to-end AI pipeline that transforms real-time news and social media trends into coherent stories.**
- **Applied NLP and Transformer-based classification to analyze and rank trending content.**
- **Implemented RAG with vector search to provide relevant contextual for story generation.**

- Fine-tuned an LLM using LoRA and integrated Text-to-Speech for audio storytelling.

Certifications & Professional Training

NTI Summer Training – Data Analytics (120 Hours) – 2025 Score: 95.5%

ITI Summer Training – Artificial Intelligence (90 Hours) – 2025 Score: 96.5%

GDG Data Science & AI Bootcamp (36 Hours) – 2025

IBM Data Science Professional Certificate

Volunteer & Leadership Experience

IEEE Volunteer

- Participated in organizing technical events and supporting student activities.
- Team Leader – GDG Bootcamp Competition
- Led a data analysis team of bootcamp participants and achieved 2nd place.
- Coordinated task distribution, technical implementation, and presentation delivery.

Skills

Technical Skills:

Programming: Python, SQL, C++, Java

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Classification, Regression, Ensemble Learning, Stacking, Boosting, Feature Engineering, Cross-Validation, Hyperparameter Tuning

Deep Learning: Neural Networks, CNNs, RNNs, LSTM, GRU, TensorFlow, Keras

NLP & Generative AI: NLP, Text Preprocessing, Text Classification, Transformers, Embeddings, RAG, Vector Databases, LLMs

Deployment & Tools: Streamlit, Git, Jupyter Notebook, Google Colab

Databases: SQL, MySQL

Soft Skills: Problem Solving, Communication, Leadership, Analytical Thinking, Time Management
